

The board recognizes the value of interscholastic athletics and extracurricular activities in promoting leadership and team skills, practicing democratic principles, and encouraging the lifelong learning process. Students are encouraged to participate in opportunities available at the school, including interscholastic athletics and student organizations. All activities are open to all students attending that school unless a restriction is justified and has been approved by the principal. The principal shall ensure that students and parents are notified of the various opportunities for participation in extracurricular activities. The principal shall establish any rules necessary for school and student-initiated extracurricular activities.

A. EXTRACURRICULAR ACTIVITY REQUIREMENTS

Participation in extracurricular activities, including student organizations and interscholastic athletics, is a privilege, not a right, and may be reserved for students in good academic standing who meet behavior standards established by the board, the superintendent, or the school. Participation in extracurricular activities may be restricted if a student (1) is not performing at grade level as provided in policy 3400, Evaluation of Student Progress; (2) has failed to meet any applicable attendance requirements; (3) has violated the student conduct standards found in the 4300 series of policies; or (4) has violated school rules for conduct. In addition, in order to be eligible for interscholastic athletics participation, students must meet all eligibility standards of law and the State Board of Education, as well as any locally established requirements for interscholastic athletics participation.

School administrators choosing to exercise the authority to restrict participation based upon any of the reasons provided in the previous paragraph shall provide this policy and any additional rules, including attendance requirements, developed by the superintendent or the principal to all parents or guardians and students.

The grievance procedure provided in policy 1740/4010, Student and Parent Grievance Procedure, may be utilized by parents or students who believe that a student has been aggrieved by a decision made pursuant to this policy.

B. SPECIAL CIRCUMSTANCES

1. Extracurricular activities may be used as a component of an at-risk student's intervention plan. The intervention plan may include providing for or restricting the student's participation in extracurricular activities. If the plan restricts the student's participation, the plan must include other intervention strategies designed to improve student performance.
2. Students with disabilities must be accorded the legal rights required by federal and state law.

3. School administrators shall facilitate the inclusion and participation in extracurricular activities of children of military families, as defined in policy 4050, Children of Military Families transferring into the district, to the extent they are otherwise qualified, by:
 - a. providing information about extracurricular activities to incoming children of military families; and
 - b. waiving application deadlines.

C. HOME SCHOOL STUDENTS

Any home school student whose primary residence (as defined in 16 N.C.A.C. 6E .0207) is in the school system and who is dually enrolled in accordance with the school system's enrollment and assignment policies and procedures is eligible to participate in high school interscholastic athletics if the student complies with the requirements of this subsection and meets all applicable eligibility standards of law and the State Board of Education as well as any applicable locally established requirements for interscholastic athletics participation.

1. The student must present a home school card from the Division of Non-Public Education for the previous and current school years as well as a transcript, attendance record, and immunization records. Prior to the first date of practice, the student must provide the results of a nationally standardized achievement test, taken within the last year, that indicates the student was on grade level at the time the test was taken. The student must also present proof of catastrophic accident insurance coverage unless the student is covered under the board's catastrophic athletic accident insurance policy.
2. The student must have been enrolled in a registered home school for 365 days prior to participation in athletics. Once dually enrolled and deemed eligible to participate in athletics, the student must maintain continuous dual enrollment. Failure to maintain continuous enrollment would render the student ineligible for athletic participation for 365 days.
3. The student must participate in a class schedule at the assigned school that is at least one half of the assigned school's instructional day. At least one class must be taken on campus each semester. The student must pass all classes in which the student is enrolled at the assigned school in order to maintain athletic eligibility.

4. The student must notify the principal of the assigned school in writing of the student's intent to try out for an athletic team at least 10 days prior to the first practice date of each sport season in which the student wishes to participate. Failure to comply with this requirement renders the student ineligible for that sport season.
