

The board is committed to designing new and renovated facilities in a manner that maximizes the use of space, conserves environmental resources and produces structurally sound and safe buildings. All school buildings should be designed to create safe, orderly and inviting learning environments where students can succeed. School buildings also will be planned to the extent feasible for maximum use by the community and for providing extended services to students.

The superintendent is responsible for overseeing the design of facilities that have been identified in the long-range facility needs plan and have been approved for funding. New or renovated facilities must be designed to meet all legal requirements, including legal standards for accessibility and use of facilities by persons with disabilities. Plans also must take into consideration the facilities guidelines developed by the North Carolina Department of Public Instruction. The superintendent will utilize services of outside professionals, including architects and other consultants, in the facility design and construction. Any contract for professional services must be (1) reviewed by the board attorney, (2) approved by the board, unless the board has delegated this authority to the superintendent in policy 6420, Contracts with the Board, and (3) meet the requirements of any applicable board policies. (See policy 9110, Use and Selection of Architects, Engineers, Surveyors, and Construction Managers At Risk.) The superintendent also will involve school staff, parents and students in the design of school buildings.

Before investing any money in the construction of any new building, or when using any state money for the erection, repair, or equipping of any building, the superintendent must submit the plans to the State Board for review and comment and must review the plans based upon a consideration of the comments received.

Plans for science facilities in new middle and high schools are subject to approval by the State Board of Education in accordance with G.S. 115C-521(c1) and State Board of Education policy.

The superintendent will report periodically to the board on the development of facility plans. The superintendent also will report on the State Board's review of facility plans conducted pursuant to G.S. 115C-521(c) and this policy and must specifically address any concerns noted by the State Board. The board will give final approval of facility plans before investing money into new buildings or renovations.
